Document Type: Prescription

This structured data represents a prescription for medication, specifically Oxprelol in a strength of 50mg, to be administered three times a day (TID). The medicine is listed twice, which suggests that the patient should take two doses of Oxprelol 50mg TID according to this prescription. The document type indicates that the data provided is related to a prescription. It's important for patients to follow their prescribed medication regimen closely and consult with their healthcare provider if there are any questions or concerns regarding their prescriptions.
